

Education of a pharmacist who will have splendid faculty to be a leader of them

○ Takao Shimazoe, Hiroshi Suemune, Shun Higuchi
(Dept. of Pharmacoepidemiol., Graduate Sch. of Pharmaceut. Sci., Kyushu University)

We try to educate students those will have splendid faculty and will become reliable medical staffs in future. The pharmacist's occupation field will spread more and more. Then, "high technology" and "high touch" are necessary in multidisciplinary treatment. In other words, repletion of hard ware with high quality and accurate and rapid communication between medical staffs are indispensable.

We focus on "informed consent" in interprofessional medical education of medical field. It is specially mentioned characteristic in our university education. This classroom will be mainly held in Research Center for Education in Health Care System. One group will be composed of small number of students in Faculty of Medicine, Dentistry and Pharmaceutical Sciences. The class will be short-termed concentrated curriculum formed by associated lectures from teachers in Faculty of Law, Literature and medical fields, symposium planned by the students, small group discussion and role playing. In former part, lectures will be conducted by teachers in Faculty of Law, Literature and medical fields on historical background, conception, ethical basis, legal side, rights of patients and self-determination. In latter part, teachers in Faculty of Medicine, Dentistry, Pharmaceutical Sciences, and Department of Health Sciences will give outlines of informed consent in daily life, education and research. Thereafter, symposium planned by the students will be held. Then, they will discuss in small group beyond faculty. Moreover, after discussion of case study, they will have a role playing as a practical lesson. In this role playing, we will ask for the assistance of standardized patients. The class will be held in a faculty room.

From now on, multidisciplinary treatment will become more and more important. We will purpose the fosterage of a pharmacist who has an faculty to be a leader.
