

S09-4 **Something to keep learning until now**

○Ryo MINARI¹

¹Japan Pharmacy

It has been unaware of that fundamental self-changes since I started to work when I think about myself. However, the following is what I learned after I had been into the real world and the some concrete examples are mentioned.

- 1) The person cannot be standing alone in the society.
- 2) Communication is necessary for everything not for working.
- 3) Creation of environment to require communication is important.

Pharmacist's strong point and weakness are recognized in my point of view as a management director and pharmacist.

- 1) Individual characteristics at the time to decide to go Pharmacy school
- 2) Built characters during working as a pharmacist
- 3) Some special feature acquired at the uncertain time

It is true that the individual challenging attitudes might be formed by the organization that he/she belongs to. The organization is important to develop careers also.
