

S16-4 Nurturing of pharmacists bearing self-medication age

○Hyoma ODA¹

¹JAPAN ASSOCIATION OF CHAIN DRUG STORES

Now, 45-year-old or more people are using the 80% for the medical expense of Japan exceeding 34 trillion yen. The result of the measures doesn't go up though the country introduces the medical examination and the health guidance, and began metabolic syndrome measures. Though the reason is various, the drugstore which 800 shoppers a day visit and 30 percent of sales is medicine, is 15,000 in our country. There is no hand that doesn't use this. The organization was started up for the nature improvement of the drugstore work pharmacist in September. Then, there was a participant who passed 20,000 people by middle of October. The store of 30 percent deals in the preparation, and the supplement etc. have been treated widely now. Pharmacists are in the standpoint where the how many people one metabolic syndrome forerunner patient can be treated and the medical institution information in the region be acquired from many customers in various shape so every day. It is such people that keeps adequate the consultation encouragement (already consulted a physician) that cannot be done in the dispensing pharmacy and the second opinion advice, etc. The talent promotion theme is only on the site. The university person should be voluntarily toward the site, know the site more, and verify an educational content with the administration. In addition, I want you to appear one after another talent who can do the effort to straighten the law, In addition, the effort to straighten the law is done, and I want you to appear one after another talent who can demonstrate the official power given for the people in the opened environment.
